**Lack of Unity**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1 to 9, drawn to a process for the preparation of known compounds of formula (1), classified in Class 564 subclass 170.
- Group II, claims 10 to 12, drawn to a series of compounds of Formula II, classified in Class 564, subclass 161.
- Group III, claims 13 to 15, drawn to a series of compounds of Formula III, classified in Class 540, subclass 485
- Group IV, claims 16 to 18, drawn to a series of compounds of Formula VII, classified in Class 564 subclass 192.

The inventions listed as Groups I through IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I, is ***drawn to a process for the preparation of compounds of formula I***, which does not necessarily required any of the claimed compounds in claimed in Groups II, III or IV for its preparation. Compounds of Formula I can be prepared by other alternative processes.

Compounds claimed in Groups II, III and IV can be used in multiple other synthesis.

Compounds claimed in Groups II, III and IV contain significantly different chemical structures and belong to different classes and subclasses.

A given references anticipating or suggesting any of the compounds claimed in Groups II, III or IV cannot be used to reject any of the claims of Group I under 35 USC 102 or 35 USC 103.
